

## Lockdown Emergency Notification System Solution Components

**The most important aspect in emergency response is communication. In fact, the first 20 seconds are critical in an emergency situation. How will you respond to keep your school safe?**

With school safety becoming a top priority for both parents and school officials, districts and institutions continue to look for better ways to protect students and faculty, alert authorities quicker and more effectively, and improve overall communications—especially during a crisis situation.

*Our comprehensive communications system fully addresses what a school district needs in the case of a lockdown, shelter-in-place or evacuation event.*

- Dozens of school districts, municipalities and libraries trust us
- Best-in-class communication solutions

## Lockdown Emergency Notification System

### Three Distinct Solutions

*Packages start at \$6,000*

#### LENS I – Audio Only

- For customers who currently own a Mitel/ShoreTel VoIP Phone system or are purchasing one
- Provides enhanced audio notifications throughout the school building over the existing PA system,, Mitel/ShoreTel IP phones, or both
- Emergency Notification announcements can be triggered by a Mitel/ShoreTel phone and/or a mounted panic button
- Designed for any sized school that is only looking for audio notifications

#### LENS II – Audio & Visual

- For customers who currently own a Mitel/ShoreTel VoIP Phone system or are purchasing one
- Or, for those who would like to integrate the LENS system with their existing, non-Mitel/ShoreTel phone system
- Provides enhanced audio notifications throughout the school building over the existing PA system, Mitel/ShoreTel IP phones, or both
- Strobe lights (beacons) are added for additional visual notifications for entrance ways
- and potentially noisy areas such as cafeterias, gymnasiums, band rooms, etc.

#### LENS III – Complete Solution

- For customers who currently own a Mitel/ShoreTel VoIP Phone system or are purchasing one
- Or, for those who would like to integrate the LENS system with their existing, non-Mitel/ShoreTel phone system
- Provides enhanced audio notifications throughout the school building over the existing PA system, Mitel/ShoreTel IP phones, or both
- Strobe lights (beacons) are added for additional visual notifications for parking lots, entrance ways, hallways, and potentially noisy areas such as cafeterias, gymnasiums, band rooms, etc.
- LED sign boards for added visual notification particularly for areas of the building where school visitors may be present like the main entrance and auditorium
- Strobes, LED sign boards, and additional horn/speakers are wireless, receiving a UHF radio frequency to be triggered. Allows for placement of these components in remote areas of the school grounds where wiring is too difficult or cost prohibitive
- Designed for schools with a larger footprint including remote areas such as parking lots and athletic fields, which may be too far or difficult to be hard-wired

***Final package price will be based on school size and requirements.***
