Paging, Bells, and Clocks:
Synchronized Solutions for Educational Facilities

Eastern DataComm provides comprehensive, synchronized solutions to improve daily communications. Synchronizing your paging system, bells, and clocks allows your school to accurately share the schedule for the day while ensuring you can communicate effectively in an emergency.

Right-Fit Technology Essentials

Collaborative: Work with a collaborative technology partner for your paging, bells, and clocks so you always know who to contact with any issues

User-Friendly: Choose clock and bell systems that are user-friendly so day-to-day schedule changes are simple

Current: Keep your clocks, bells, and paging systems up to date to avoid losing time and money on repairs

Integrated: Choose clock, bell, and paging systems that integrate with your emergency response technology

Clear Audio: Choose systems that offer crystal clear audio quality to avoid confusing communication issues

Customized Solutions: Personalize your paging, bell, and clock systems so that they meet the unique needs of your school and district populations

Integrated School And District-Wide Technology

Paging and Intercoms

The intercom and paging system is a significant factor in the daily communications of your school, so it's important to ensure that school is equipped with a system that guarantees smooth and clear communication for your faculty, staff, and students.

Bell Schedule

Our team installs a bell controller that gives you complete and total control over the school day, improving the ease of use as compared to the complicated traditional analog bell systems.
Clocks

Synchronize the school day with our wireless clock solution, ensuring that each clock is in sync with your clock controller and automatically updates for things like daylight savings time.

Customized Alerts & Lockdown Solutions

When every second counts, are you able to respond rapidly? Send customized alerts to teachers, students, and the proper authorities swiftly and efficiently. To further safeguard your campus, LENS + OPTICS, our emergency notification solution and continuous monitoring service, allow you to initiate and announce a lockdown sequence with ease and clarity, integrating seamlessly with your paging system, bells, and clocks.

Challenges Districts Face With Paging, Bell, And Clock Systems

When Bells And Clocks Are Out Of Sync, It Creates Confusion

Systems that are out of alignment can disrupt the flow of the day. Eastern DataComm offers solutions that get clocks in sync and help you maintain and adjust times with ease.

Aging Paging And Intercom Systems Make It Hard To Hear You Clearly

You need clear intercom exchanges and paging messages. Our paging and intercom systems provide crystal clear audio for effortless communication.

Outdated Systems Cost More And Take More Effort To Repair

If your current system requires manual adjustment and out-of-date parts, repairs can be difficult and expensive. Eastern DataComm provides systems that keep your school day running smoothly.

Aging Bells, Clocks, Intercom, And Paging Systems Impact School Safety And Security

Older systems may not be able to deliver messages clearly, synchronize with other systems, or offer proper guidance to those in the building leading to slow response times in the event of an emergency.

At Eastern DataComm, we can integrate our lockdown and emergency notification system and continuous monitoring service (LENS + OPTICS) with paging, video surveillance, and access control systems. This comprehensive approach ensures that your technology is always working to protect your students, staff, faculty, and visitors.
