

## Elevated Video Surveillance Solutions

*It's vital to take steps to protect the safety of your business, municipality, or school district.*

*With Eastern DataComm's state-of-the-art video surveillance solutions, you have a 24/7 comprehensive picture of what goes on and when it happens within the confines of your buildings and grounds.*

*Whether you are protecting your schools from potential threats, guarding your organization against theft, monitoring employees and machinery, or creating a daily record of business activities for liability purposes, we can provide you with an optimized surveillance solution that will meet your specific needs.*

### Public Safety And Property Security

Proper video surveillance allows you to see what events occur on your premises, as well as when and where they occur. We customize video surveillance system solutions that secure property and improve the safety for those who frequent your buildings and grounds.

### Deterring Crime And Collecting Evidence In Legal Matters

Video surveillance systems can play a pivotal role in deterring crime from happening in your buildings or on your campus. The mere existence of a system can dissuade a person or persons from perpetrating destructive and criminal acts, knowing their actions will be recorded. Furthermore, video surveillance footage may serve as a source for evidence in legal matters. Our systems provide integrated notifications and alerts that empower you to proactively address issues as they arise.

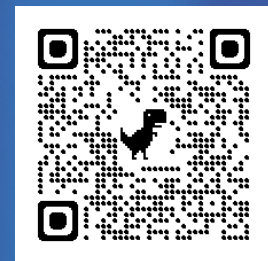

### Addressing Safety Concerns

All who enter your facilities deserve to feel comfortable and safe. At Eastern DataComm, we specialize in providing systems that enable you to keep a watchful eye over your buildings and grounds. Rest assured that you will be better able to ensure the safety of your community with our video surveillance solutions.

### Video Surveillance: An Essential Part Of Your Security Technology Solution

Video surveillance is an integral part of ensuring your building and grounds are safe and secure.

# Eastern DataComm's Video Surveillance Systems Offer:

## Premise-Based Solutions

Premise-based solutions provide on-site Network Video Recorders (NVRs) that are customizable to fit the unique needs of our clients. Our solution includes a deep catalogue of high quality cameras and user-friendly software that provides innovative features like motion search and people/vehicle analytics for more efficient searches.

## Cloud-Based Solutions

Our cloud-based solutions offer many of the benefits enumerated above with the key difference being that there are no on-site NVRs to manage. This option affords our customers enterprise-grade features right out of the box, including ease of sharing live or recorded footage with appropriate personnel.

## Peace Of Mind When It Comes To Safety

At Eastern DataComm, we understand the value of instilling a sense of security in your community. We design a cost-effective video surveillance strategy based on your organization's needs. We strive to provide our customers with solutions that enhance an organization's physical security while improving workplace performance and efficiency.
