

Building Safety and Efficiency into Manufacturing Environments

Our Commitment

Eastern DataComm empowers manufacturers along the Eastern Seaboard with technology that protects employees, secures facilities, and streamlines operations.

Your Challenges

Immediate alerts in loud production environments

Protecting sensitive equipment and materials

Preventing downtime due to safety incidents or communication breakdowns

Complying with safety regulations

Our Solutions for Manufacturers

Video Surveillance & Access Control

Monitor facilities and manage entry to secure areas.

Enterprise Networking & Cybersecurity

Protect data integrity and secure digital operations.

Cellular Repeaters

Eliminate communication dead zones in facilities and yard areas.

Emergency Notification

Deliver instant alerts across warehouses, yards, and offices.

VoIP & Cloud Communication Platforms

Keep your manufacturing sites connected across geographies.

Intercom, Paging, Bell, & Clock Systems

Synchronize operations across large spaces.

Fencing & Gates

Control vehicle entry, monitor gates, and protect manufacturing facilities.

Environmental Sensors

Detect temperature fluctuations, flooding, or hazards impacting the health and safety for your community.

Why Eastern DataComm?

Our team works with you to integrate safety and communications into your production process without disrupting workflow.

Ongoing Support You Can Count On

Our team of expert technicians provide ongoing *support services, monitoring, and maintenance packages* that power reliable performance and lasting peace of mind.
