

Safety and Communication Solutions for Multi-Property Management

Our Commitment

For over 35 years, Eastern DataComm has delivered solutions that keep tenants safe, informed, and connected. We design systems that help property managers streamline communications, secure facilities, and respond quickly to incidents.

Your Challenges

Managing security across multiple properties or tenants

Rapidly communicating with residents and staff

Coordinating maintenance and emergency response

Integrating systems across different buildings

Our Solutions for Property Management

Video Surveillance & Access Control

Monitor facilities and manage entry to secure areas.

Enterprise Networking & Cybersecurity

Protect data integrity and secure digital operations.

Cellular Repeaters

Eliminate communication dead zones in facilities and yard areas.

VoIP & Cloud Communication Platforms

Keep your offices and buildings connected across geographies.

Fencing & Gates

Control vehicle entry, monitor gates, and protect residents, visitors, and staff.

Environmental Sensors

Detect temperature fluctuations, flooding, or hazards impacting the safety of your communities.

Why Eastern DataComm?

We provide tailored solutions that integrate with existing infrastructure, helping you maintain safety and satisfaction across all properties.

Ongoing Support You Can Count On

Our team of expert technicians provide ongoing *support services, monitoring, and maintenance packages* that power reliable performance and lasting peace of mind.

Enhance property safety and communication
